Gentlemen:

~~Central Intelligence Agency~~

We are forwarding to you one set of utility field inspection plans on the captioned project.

A utility field inspection is scheduled for Tuesday, September 2, 1986, to be held at the Fairfax Residency Office at 10:00 AM.

I call your attention to the accelerated program that it will be necessary to review these plans prior to the meeting and be prepared to discuss your existing facilities and your proposed method of relocation.

Any necessary utility easement will be submitted within two weeks of utility field inspection with Plan and Estimate due by November 1, 1986.

At this time we wish to apprise you of Navigable Waters and Wetlands Permits which may be required for the relocation and adjustment of your facilities. Whenever navigable waters and/or wetlands are subjected to discharge of dredged or fill material, obstructions or alterations, due to relocation of your facilities, a permit will be required. Please refer to Chapter VIII, Section 0 of the "Utility Relocation Procedures Manual" for the requirements of the various permits and be able to discuss this matter at the utility field inspection.

(Continued Page 2)

Page 2

If any portion of your facilities are located on existing highway rights of way, with prior rights or under previous agreement, which will make the State responsible for the relocation costs, kindly furnish this information to the State Right of Way representative at this meeting, so the cost responsibility can be determined at this time.

Your attendance and participation in this meeting is respectfully requested.

Sincerely,

W. A. Curtis

District Utilities Engineer
